Work Experience

Coenterprise: Software Analyst   6/18-Current
> Updated and deployed managed file transfer services on Unix systems with IBM and Axway tools.
> Created custom automated migration systems to allow for projects to scale. Built with Python & Java.
> Track daily progress using SQL and Tableau.

Intigo3D: Full Stack Engineer   7/17-5/18
> Created an encrypted print pipeline using embedded hardware, Python, AWS IoT.
> Developed a web service for designers that allowed them to sell their work and fight piracy using React and Node.
> Consulted on marketing and strategy, building media kits for investors to raise funding.

NYU, MakerSpace: Technical Lead   2016-2017
> Created the initial software infrastructure using Node, Flask and Python paired with the machines in the space.
> Built our hardware and monitoring resources to help students utilize the space and tailor it to their needs.
> Coordinated larger projects with other staff and taught technical skills in weekly workshops to NYU students.

Grafiti: Data Visualization Intern   Fall '17
> Designed interactive visualizations using 6 million lines of data to demonstrate the Grafiti system.
> Used Kaggle for initial data, Python (pandas) for filtering, Google Big Data and Cloud for visualization and analysis.

Mango Concept [Full-service digital agency]: Rapid Development Intern   Summer '16
> Rebuilt video system using web technologies and bootstrapping existing solutions. Decreased load times by 300%.
> Started an advertising platform for one of Mango's brands, increasing product awareness by 75%.

NYU, Engineering and Technology Forum: Prototyping Focused Teaching Assistant   2015 - 2016
> Taught a weekly class for all first-year engineering students about entrepreneurship.
> Developed and graded weekly projects based on the lean startup methodology.

Howl Interactive: Co-founder   2013 – 2017
> Built games and utilities for mobile. Used Swift, Java, and frameworks like React Native as they became available.
> Incorporated the company and handled the business side of an early stage start-up.

Projects

Rocket Telemetry: Used python and sensors (accelerometers, GPS, cameras) to track a rocket with triple redundancy.

D-20: Implemented a server side neural network to detect different kinds of music and display it with lights on an art piece.

Uber Movement: Made Uber Movement data accessible in a public facing API and displayed it in graphs using node js.

Resonance Research: Used Matlab and python to develop technology to mitigate surgical risk using sound and vibration.

Skills

Software	Hardware	Design	Languages
Digital Logic	3D printing	User Experience Design	C++
Computer Architecture	Arduino	Wearable Technology	HTML/CSS
Data Structures	Circuit Design	Motion Graphics	Java
Data Analytics	Laser Cutting	Typography	Javascript [React]
Docker	Raspberry Pi clusters	Adobe Suite	SQL
	CNC	Data Visualization [Tableau]	Python

Education

New York University | School of Engineering   2018
   B.S. Integrated Digital Media
      A degree that combines computer science with design to create compelling digital products.
